## **DETAILED ACTION**

### ***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-47 and 52, drawn to semiconductor device, classified in class 257, subclass 197.
  - II. Claims 48-51, drawn to method of manufacturing a semiconductor device, classified in class 438, subclass 312.
2. Inventions II and I are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case that the product as claimed can be made by another and materially different process. For example, instead of making an electrode contact layer with at least one of collector, base and emitter electrodes. Aluminum can be used as at least one of collector, base and emitter regions without the use of forming a electrode contact layer.
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
